Students' Satisfaction Survey report

During the academic year 2023-2024, a comprehensive students' satisfaction survey was conducted at our institution using an online platform. A Google Form was created and distributed to students via Google Classroom and other social networks such as WhatsApp. The questionnaire was designed in both English and the regional language (Marathi) to ensure inclusivity. Each multiple-choice question provided four options and students were requested to submit their responses within a stipulated period of time. The survey received an overwhelming response, with more than seven hundred students actively participating (762).

A detailed analysis was conducted to quantify the responses received. Each response was assigned a weight, and a grade point was calculated for every question. The overall analysis and grade points are summarized below:

Total no of responses:
